

TOP TIPS: FILE SHARING

- Visit ProMusic and try out legal download sites.
- Read every screen when you are downloading filesharing software to make sure that you aren't sharing too many parts of your computer with other users!
- Always let your parents/carers know if your antivirus and spyware software tell you it's time to update.
- If you think you have downloaded a net nasty by mistake make sure you tell someone about it and report it.
